Cover Letter – Agentic AI & GenAI Lead | Multi-Agent Systems on AWS, LLM, Agentic RAG, MCP, Machine Learning & Deep Learning Leadership

Domain Exposure: Banking & Financial Services (JPMorgan Chase) | Insurance (Trianz) | Automotive (GM) | Defense (DRDO) | Weather (IMD) | Geoscience (CSIR)

Dear Hiring Manager,

I am writing to apply for senior technical leadership and architecture opportunities in **Agentic AI, Generative AI, Multi-Agent Systems, Large Language Models (LLMs), Agentic RAG, Model Context Protocol (MCP), Machine Learning, and Deep Learning**. With **10+ years of experience**in applied ML/DL and cloud-native AI engineering, I specialize in architecting governed, production-grade multi-agent and LLM platforms on **AWS and Azure**that turn complex enterprise workflows into measurable business outcomes across banking, insurance, automotive, defense, weather, and geoscience.

Currently, I serve as an **Applied AI ML Associate Senior at JPMorgan Chase (Hyderabad)**in Home Lending & Data Management, where I design and build governed **Agentic AI workflows with LangGraph and Model Context Protocol (MCP)**—including a multi-stage home-loan processing pipeline that cut end-to-end processing time from **45 days to 7 days**. I also architect event-driven document extraction and decisioning pipelines on **Kafka (MSK), AWS Bedrock, Textract, S3, and Aurora** (speeding up processing by **45%**), build high-velocity Python microservices (**FastAPI, SQLAlchemy, Pydantic**) using **Spec-Driven Development** (accelerating delivery by **80%**), contribute to governed **Agentic RAG** platforms reaching **96% accuracy**in regulated banking environments, and productionize scheduled AI/data workloads on **EventBridge Scheduler, Lambda, Aurora, and ECS/ECR** (reducing failure rates by **60%** and manual effort by **70%**).

Previously, as **Senior Technical Lead and Technical Lead at Trianz Digital Consulting (2024–2026)** , I led a **five-member cross-functional engineering team**from requirement discovery and client-facing presales demos to production delivery. I architected **"Reimagining Claims Adjustment"** using **AWS Strands Agents, CrewAI, MCP, GPT-4o, Bedrock AgentCore, and vision agents**, cutting manual insurance claim processing from **10–15 days to 15 minutes** (**60% faster** claim response) and helping Trianz win **First Runner-Up at the Global AWS Nova Challenge 2025** and the **Team Excellence Award (Anytime Awards 2025)**. Across insurance, legislative, and media engagements, I also delivered a real-time NYL insurance chatbot on **Bedrock Claude & OpenSearch Serverless** (**90% accuracy improvement**), a congress.gov legislative bill summarization platform (**50% faster analysis**), and authored the published whitepaper on **AI-driven Intelligent Email Automation (Claude LLM)** that classifies and routes **~2M emails at ~95% accuracy**, improving operational efficiency by **60%**.

My foundation spans deep learning and predictive analytics across **People Tech Enterprises (Principal Data Scientist)**—where I built automotive monitoring and insurance models for GM (US) using **XGBoost, IsolationForest, and Hugging Face Transformers** (**94% detection accuracy, 40% faster claims**)—as well as real-time anomaly detection on **Azure Databricks & Stream Analytics at Teamware Solutions** (**35% cloud cost savings**), **LSTM seismic early-warning models at CSIR–NGRI**, **VGG19 radar cloud classification at IMD–IITM** (**92% accuracy**), and low-latency **UAV deep learning systems at DRDO–VRDE**. My architectural work is backed by **3x AWS Certifications** (**Generative AI Developer – Professional [AIP-C01], Machine Learning – Specialty [MLS-C01], AI Practitioner [AIF-C01]**), strong engineering governance (**Python 3.13+, FastAPI, Responsible AI, AI Security & Governance**), and enterprise integrations across **Snowflake and Salesforce**.

I am eager to bring my hands-on multi-agent architecture leadership, regulated banking and insurance delivery track record, and Spec-Driven Development discipline to your organization. Thank you for your time and consideration—I look forward to discussing how my experience can accelerate your AI roadmap.

Sincerely,

Jampala Naresh

Agentic AI & GenAI Lead | Applied AI ML Associate Senior (JPMorgan Chase)
Multi-Agent Systems on AWS · LangGraph & MCP · Banking, Insurance, Automotive & Defense

3x AWS Certified & Agentic AI Credentials:

- **AWS Certified Generative AI Developer – Professional (AIP-C01)**
- **AWS Certified Machine Learning – Specialty (MLS-C01)**
- **AWS Certified AI Practitioner (AIF-C01)**
- AWS Partner: Strands Agents Deep Dive (Strands SDK) & Amazon Bedrock AgentCore
